

Seif El-Din Mohamed Osman

Software Engineer — Full-Stack Web Applications & Enterprise Systems

📍 Egypt, New Cairo — ✉ seifmohamed321432@gmail.com — ☎ +20 (10) 99 727 988
🌐 [Portfolio](#) — [GitHub](#) — [in LinkedIn](#)

Summary

Software Engineer experienced in building scalable enterprise web applications, internal operational systems, and customer-facing SaaS platforms. Skilled in React, ASP.NET Core, REST APIs, and modern frontend architecture. Experienced delivering production-grade solutions across financial services and commercial platforms.

Professional Experience

Software Engineer — PwC ETIC

2026 – Present

Cairo, Egypt

- Develop and maintain enterprise-grade internal systems and workflow automation tools within the Financial Services division
- Build scalable web applications using React and ASP.NET Core with RESTful API integrations
- Collaborate with cross-functional teams to improve operational efficiency, system reliability, and delivery workflows
- Participate in architecture discussions, debugging, feature planning, and production support

Software Engineer (Part-time) — Sobek IT (Pty) Ltd

2025

Johannesburg, South Africa (Remote)

- Developed scalable frontend modules and dashboard systems for smart city digital transformation initiatives
- Built reusable UI components and integrated backend APIs for enterprise applications
- Collaborated in agile delivery cycles with designers, engineers, and project stakeholders

Education

BSc Computer Engineering & Software Systems (Dual Degree)

2020 – 2025

Ain Shams University (Cairo) & University of East London (UK)

Key Projects

Distributed Commerce Management Platform

- Engineered scalable customer-facing e-commerce platform with dynamic product variants, secure checkout flows, and administrative management dashboard
- Integrated Stripe payment processing, reusable UI architecture, pagination, filtering, and optimized state management workflows

Automotive Operations & Workforce Mobility System

- Developed cross-platform mobile application for dealership operational management and employee workflow tracking
- Integrated Firebase authentication, real-time data synchronization, and scalable mobile state management architecture

Hospitality Operations & Reservation Management System

- Built responsive hotel operations management system with booking workflows, dashboard analytics, and role-based operational interfaces
- Implemented efficient asynchronous data fetching and caching strategies using React Query

Skills

- **Languages:** JavaScript (ES6+), TypeScript, C#, SQL
- **Frontend:** React.js, React Native, Next.js, HTML5, CSS3, Tailwind CSS, Shadcn UI
- **Backend:** ASP.NET Core, REST APIs, Entity Framework Core, Node.js, Authentication & Authorization
- **Databases:** SQL Server, PostgreSQL, Firebase, Supabase
- **State Management & Data:** React Query, Zustand, Context API
- **Tools & Practices:** Git, Agile Methodology, Responsive Design, Performance Optimization, Cross-Browser Compatibility
